Scenario 1: Global Stablecoin Payment Relay

Kennesaw State University

*We make cross-border payments simple, secure,
and transparent; community-verified stablecoins
for everyone, anywhere*

Problem Statement/Opportunity

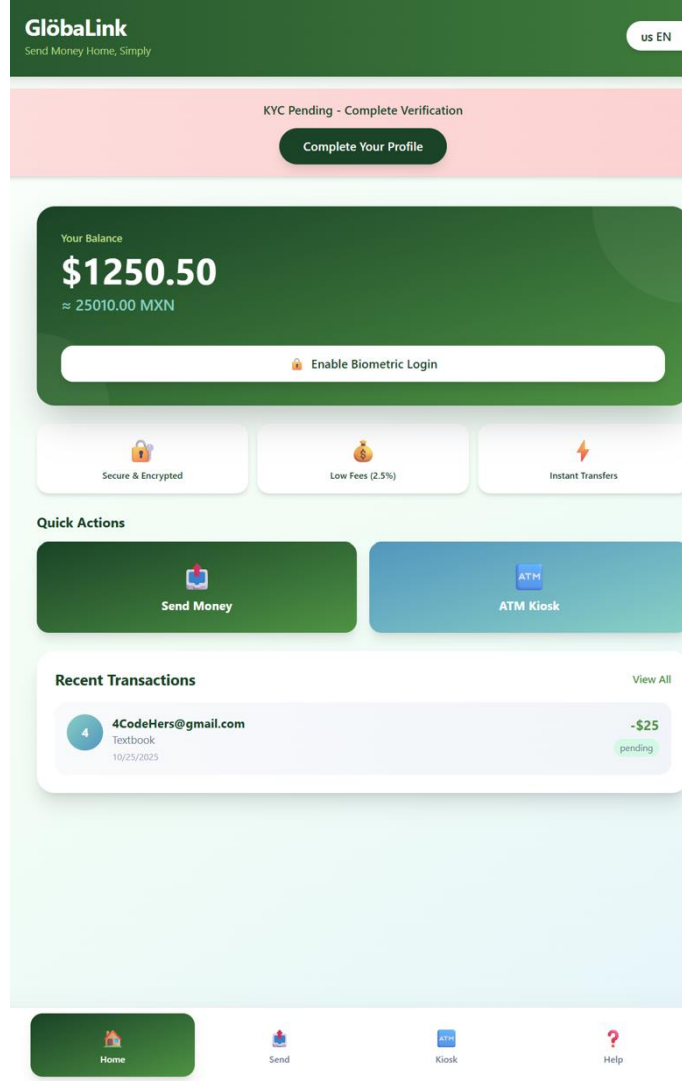

Millions of people around the world—including students, migrant workers, and small business owners—struggle to send or receive money internationally due to high fees, long delays, and lack of access to traditional banks. Cross-border remittances for unbanked or underbanked populations remain slow, expensive, and inaccessible.

Department of Information Systems

Solution

They need a **fast, affordable, and trustworthy** payment system that works across borders, devices, and networks, even with low connectivity or limited ID verification, and eliminate the needs for centralized banks.

Value

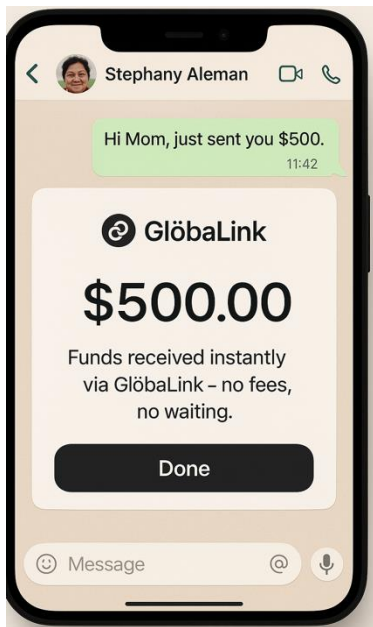

- We are different because we are emphasizing reach to even the rural areas where low-bandwidth is still a problem that needs to be solved. We serve on underdeveloped communities and immigrants.

Business Model

Category	Details
Customers	- Migrant workers & rural families - Foreign exchange students - First-generation Americans - Small businesses & freelancers - Local governments (support kiosk deployment in small communities)
Channels	- Mobile app (multilingual, low-bandwidth) - Solar-powered kiosks (cash in/out access) - WhatsApp integration for payments
Revenue Streams	- Transaction Fees (1–2%): • Sending money • Stablecoin ↔ Local currency conversion - WhatsApp partnership revenue (feature enablement) - Kiosk usage fees (deposit/withdrawal) - Advertising revenue (in-app + kiosk displays)
Key Partnerships	- Banks & FinTechs (API settlement & compliance) - Local Governments (kiosk approvals & adoption) - Telecoms & Solar Providers (connectivity & power) - WhatsApp / messaging platforms (embedded payments) - NGOs & Community Groups (trust & inclusion)

WhatsApp Integration

This would be our key partnership. Similar to Apple Pay, GlöbaLink would be integrated into WhatsApp. With their global reach for messaging, we would get \$0.50 per active user.

GlöbaLink Kiosk

Verifies user when any flags are raised per their Risk Profile.

Go-To-Market Plan

- GlöbaLink's go-to-market strategy focuses on reaching international students and immigrants who need fast, affordable, and reliable ways to send and receive money across borders. The plan emphasizes education, trust-building, and community-driven adoption through digital engagement and strategic partnerships.

Awareness (Pre-Launch):

- Digital Story Telling
- Waitlist campaign

Acquisition (launch):

- Early Adopter discounts.
- Multilingual Ad-Campaigns.

Engagement and Retention (Post-Launch):

- Integrate beyond Whatsapp
- Financial Education content

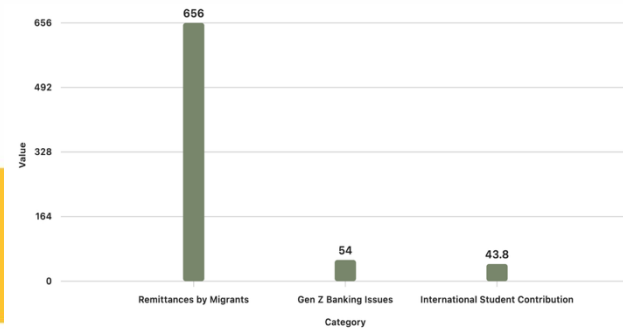

Market Analysis

Immigrants- Low-bandwidth

- A need for low data use, instant transfers, and a clear trust indicator.
- 1 in 9 people globally are supported by funds sent home by migrant workers.
- 656 billion USD was estimated to be sent in remittances to low and middle-income countries.

Global students – Limited banking options

- 54% of gen Z immigrants have experienced difficulties with banking identity verification.
- 1.1 million international students contributed \$43.8 billion to the U.S economy in 2023-2024.

This bar chart uses:

- **656B USD** in remittances sent by migrant workers.
- **54%** of Gen Z immigrants facing banking identity issues.
- **43.8B USD** contributed by international students to the U.S. economy.

Projections - Assumptions

Assumptions (from PRD + industry averages)

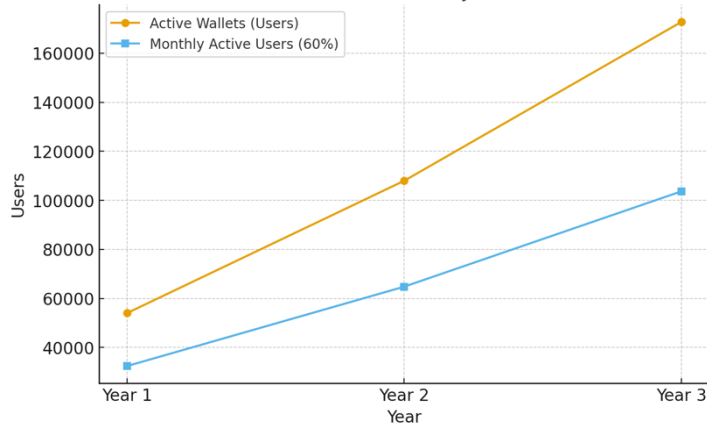

- **Starting users (active wallets):** 54,000 in Year 1
- product-requirement-document-prd
- **Growth:** ~100% Year 1 → Year 2, ~60% Year 2 → Year 3 (trust + referrals drive growth).
- **Monthly Active Users (MAU):** ≥60% of wallets
- product-requirement-document-prd
- **Referral Conversion:** 25% of new users come from referrals
- product-requirement-document-prd
- **Avg. transaction volume per user/month:** \$200 (remittances, student payments, etc.)
- **Revenue streams:**
 - **Transaction fee (1.5% average)** = sending money
 - **Conversion spread (1.5% average)** = stablecoin ↔ fiat
 - **Kiosk usage fees:** \$2 per kiosk transaction, ~10% of users use kiosks monthly
 - **WhatsApp partnership fee:** small % revenue share (est. \$0.50 per active user per year)
 - **Advertising:** \$1 per active user per year (conservative estimate)

Current Status, Accomplishments, Use of Funds

- Startup with prototype/ MVP (Minimally viable product)
- The next version: Integration with WhatsApp, similar to Apple Pay integration with iPhones.)
- With raised capital, we plan to expand in Phases. Starting ng phase 1 North America --> Phase 2 in LATAM, --> Phase 3 EU --> -> Phase 4: APAC/ Asia --> Phase 5: Africa)
